- Implemented Search Engine Optimization(SEO) for the Ballyhoo Web application.
- API integration by handling the data with the help of React and Redux
- Improved functionality and performance of the website and worked on Electron Desktop Application Platform.

### The Inforwarehouse

Ahmedabad, Gujarat

WEB DEVELOPER

May. 2017 - Jul. 2017

- During this internship, I contributed to their live projects like SkillGames, Ahtaj, etc. These projects were mostly about E-learning Web applications. It was a great experience and I learned a lot from this internship.
- **SkillGames:** This project is based on the concept of Learning by playing games. In this project, you can create your profile and after that, you will be assigned to the daily tasks which you have to complete daily to improve your learning on the particular topic. Mainly this project is designed for the students to improve their learning criteria. My contribution in this was designing the front end of the dashboard of the user.
- **Ahtaj:** This project was to reduce the effort in consulting with Advocates and Doctors. In this project, you can get the appointment, advice, etc from an Advocate or a Doctor. I was promoted to this project because of my good work in SkillGames. I contributed mainly to the feedback part of the project. The client was giving feedback to correct some mistakes on the website. So I was correcting those mistakes.

### Rural Internship at Atma Vani Welfare Society

Kanpur, Uttar Pradesh

VOLUNTEER FOR THE SOCIETY

Dec. 2016

- This Internship gave me an opportunity to know the rural and slum areas from a different perspective.
- During this internship, we visited different schools, an old-age home and an organization which is working for the deprived section of the society.
- We also observed the requirement of IT sector for these welfare organization for spreading their visions and seeking help for the same.

## Projects

---

### Projectile - Student Project Listing Platform

*Django, JavaScript, HTML and CSS*

DEVELOPER AND DOCUMENTATION HEAD

*Aug. 2016 - Nov. 2016*

- Link to the Project: <http://projectile.pythonanywhere.com/login/?next=/>
- It is a platform in which we will provide the user with the listing of the suitable projects according to their skills which they currently have. We are trying to reduce the effort and difficulty of the student, interested in doing any project.
- Anyone who is interested in doing some projects, can go to this website and select according to his skills. Currently, we are working on this website to improve further.

### Notes-Webapp

*React.js, HTML5 and CSS3*

DEVELOPER

*Jul. 2017*

- Link to the Project: <https://lalitmee.github.io/Notes-App/>
- This is a small project which is developed for taking notes. Mainly it is a web application in which we can take notes as many as we want to.
- This project was developed mainly to learn basics of React.js and understanding the flow of the mechanism of React.js. It is a very handy web application in which you can edit, add and delete any notes.

### Client Management System

*Angular.js, HTML5 and CSS3*

DEVELOPER

*Apr. 2017*

- Link to the Project: <https://github.com/lalitmee/Client-Management>
- This is a small project which is developed for management of clients or users in a company or an organization.
- Management can be done by updating the existing client, deleting the non-existing client and adding the new client.
